Military date time group dtg format

In message messages, the Date Time Group (DTG) is a set of characters, usually in a set format, used to express the year, month, day of the month, hour, hour, and time zone, if it differs from coordinated universal time (UTC). The order in which these elements are presented may vary. DTG is usually placed in the message header. One example is 21:09 on 29 October 2020 (UTC). DTG can specify either the date and time the message was sent by the transmission station, or the date and time the message was sent by the user, or the person to send it. DTG can be used as a message ID if it is unique to each message. The military date time group form DTG is used in the communication movement of the U.S. military (a form of automated messaging system). In U.S. military communications and communications (for example, maps showing the movement of troops) the format is DD HHMM-MON YY. Although sometimes seen with spaces, it can also be written as a single line of characters. Example 1: 09 1630 Jul 11 represents (July) 09 16:30 July 2011 (UTC). Example 2: 29 2109 October 20 presents (October) 29 21:09, October 2020 (UTC).
